

# Kyle Ferguson

Age 16, High School Senior

## Aspirations

“Going to MIT and study computer science is my dream. Unrealistic some might say but hard work will pay off!”

## Drive

- Learning, Coding, and helping others
- Having a strong relationship with others
- Likes new technology, and try new technology to solve issues
- Going to MIT to pursue computer science

## Goals & Needs

- Research to learn more about universities
- Someone who can guide him along the application process
- Pay back parents
- Plan B's if MIT doesn't work out

## Hesitations & Pain Points

- Lack of knowledge about different CS programs the universities have to offer
- Don't have anyone to ask when it comes to college applications
- Financial adversities
- Covid-19 made things harder
- Lack of knowledge about financial aid options in universities
